

No need Water

Tokushima Cedar Product

Wood Powder

Portable Toilet

In the disaster, the Toilet is the first thing to be needed
The functionality of cedar contributes to ensuring hygiene during disasters (water outages)

Characteristics of Wood Powder Portable Toilet

①

Deodorizing and water absorption with cedar powder

Finely ground cedar powder has a deodorizing effect and prevents odors.

②

Rapid coagulation

The polymer blend enhances the coagulation properties, allowing water and solids to solidify quickly.

③

Hygienic, one-time processing

Required number of bags are included, and each one can be disposed of individually, making it hygienic.

④

Large, thick bags for safe

The large, thick bag can be used with a variety of facilities, including existing toilet seats, temporary toilet seats, and buckets.

Initiatives toward SDGs

Through the utilization of wood and environmental education activities, we aim to conserve the natural environment of our forests, rivers, and oceans, enhance national land conservation functions, and realize a sustainable, circular society.

**In order to ensure toilets immediately after the disaster,
the Japanese government and municipalities recommend
stockpiling "Portable Toilets"**

During the Great East Japan Earthquake, temporary toilets were installed within 3 days in approximately 34% of municipalities, while it took more than a month in 14%.
In the past, during disasters / water outages, the lack of portable toilets has caused serious damage to the health of evacuees in many cases.

Tokushima Prefecture Plan

**Toilet stockpiling rate
for Disaster
(Y2020)**

**Individual,
Organization**
